

NOTICE

The City of Hibbing through a collaboration with its municipal advisory, Baker Tilly, conducted a Sewer Rate Study in 2019. The results of the study indicated that in order to maintain adequate cash flow in the Sewer Utility Fund, an annual increase of 1% to Stormwater and Sewer rates would be needed. This adopted increase became effective February 1, 2022. Here's what an average residential user can expect as a monthly increase:

	2021	2022	Increase
Residential Low User (4,000 gallons)	\$44.46	\$44.90	\$0.44
Residential Medium User (6,000 gallons)	\$56.84	\$57.41	\$0.57
Residential High User (25,000 gallons)	\$174.45	\$176.19	\$1.74
